

## CARGO SYSTEMS RETURN-TO-LEASE PROGRAM

# EFFICIENT AND COST-EFFECTIVE

### Leveraging expertise to quickly return leased aircraft to service

Quick turnaround, preserved residual value and maintenance cost savings – the Collins Aerospace cargo systems return-to-lease program was designed to save time and money.

Our cargo systems return-to-lease program is a valuable service for widebody platform owners. With comprehensive original equipment manufacturer (OEM) parts and services, we minimize aircraft downtime, extend the life of your cargo system and reduce the cost of preparing your aircraft for redelivery to the next customer.

Collins Cargo Systems is a world leader in aircraft cargo systems and solutions. We leverage extensive capabilities to offer leasing companies access to the tailored expertise they need. Our OEM engineers compile a list of parts required for a returning aircraft and ship the parts to your preferred MRO provider. This is done ahead of time to minimize aircraft downtime.

In addition, we provide technical support, troubleshooting and upgrade recommendations to quickly get your aircraft ready for redelivery and help preserve residual value. Collins cargo systems return-to-lease program customers only pay for parts actually used and receive a single invoice upon service completion.

### KEY FEATURES & BENEFITS

- Minimize aircraft downtime
- Access to OEM expertise
- Simplified approach to payment
- Improved parts availability
- Continue using your preferred MRO network
- Preserved residual value

## Program highlights

OEM engineers conduct aircraft cargo system walk

Replacement parts and potential upgrades are identified

Single shipment of parts delivered to customer-preferred MRO

Single invoice provided to customer for simplicity

Comprehensive, 24/7/365 OEM technical support available

### CAPABILITIES

- Full system hardware and software development
- Certification, including on-site Designated Engineering Representatives (DERs)
- In-house manufacturing
- Product support through full system life
- Worldwide customer support centers

Specifications subject to change without notice.
