

Paul Mongillo

Vice President, Surveillance and Network Systems

Paul Mongillo is vice president of Surveillance and Network Systems within Requirements and Capabilities for Raytheon Intelligence and Space (RI&S), a Raytheon Technologies business. He is accountable for building winning customer-facing teams to accelerate franchise-level growth and to deliver capabilities to address our customers' most important missions. The portfolio includes advanced surveillance systems connected to secure, resilient and trusted all domain communications systems.

Before this role, Mongillo served as vice president of Communications and Airspace Management within Requirements and Capabilities. Previously, Mongillo led Turkey integrated air and missile defense programs, accountable as franchise capture leader.

Previous roles include senior director leading business development for the command, control, communications, computers, cyber and intelligence (C5I) systems franchise capture to the Kingdom of Saudi Arabia (KSA); program manager for the Patriot Configuration 3 modernization and upgrade program for the KSA Ministry of Defense; and director of Information Technology.

Mongillo received a bachelor's degree in electrical engineering from Merrimack College and an MBA from Worcester Polytechnic Institute. He is a graduate of the Raytheon Technologies' Program Management College and Strategic Leadership Program, a certified program manager and capture manager and a Raytheon Six Sigma Expert.
