

## **Bryan Rosselli**

---

Vice President,  
Business Transformation & Execution

Bryan Rosselli is vice president of Business Transformation & Execution at Raytheon Missiles & Defense, a business of Raytheon Technologies. He leads a team responsible for optimizing operations of the business with a focus on integrating teams, tools and processes across functions, enriching customer value streams and driving execution across the product lifecycle.

Previously, Rosselli served as vice president of Strategic Missile Defense, leading a business area that aligns defense work to all Missile Defense Agency programs, providing advanced missile defense technologies that enable systems to see farther and guide interceptors to their targets with even greater precision. He also served as vice president of Mission Systems and Sensors at Raytheon's Integrated Defense Systems business prior to the company's merger with United Technologies Corporation in 2020.

Rosselli is an experienced engineer and program leader with a background in both ground and airborne radars, as well as product operations, systems engineering and test for a diverse range of domestic and international customers.

He holds a bachelor's degrees in physics and mechanical engineering from Washington University, a master's degree in mechanical engineering from Loyola Marymount University and an MBA from the University of Southern California.
