

Vince Campisi

Senior Vice President, Enterprise Services
& Chief Digital Officer

Vince Campisi leads the Enterprise Services group and the digital technology organization at Raytheon Technologies. He oversees the company's digital technology strategy and several global business services designed to reduce enterprise risk, optimize operating efficiency, enable business growth, and maximize outcomes for employees, suppliers and customers.

Campisi brings more than 20 years of executive experience in aerospace and defense, energy, financial services and industrial manufacturing. Most recently, prior to United Technologies Corporation's merger with Raytheon Company in 2020, Campisi served as senior vice president and chief digital officer for UTC. In that position, he led the United Technologies Digital Technology organization, which focused on cybersecurity to protect company assets, information technology to accelerate employee productivity and software and data analytics practices to enhance the customer experience.

Prior to joining UTC, Campisi was chief operating officer at GE Digital, where he focused on boosting operating margins and revenue growth, while increasing customer value using software and data analytics. In addition, he held multiple leadership positions at General Electric, including general manager, chief information officer and quality leader.

Campisi is a passionate advocate for diversity in the workplace and a sponsor for various STEM-related diversity, equity and inclusion initiatives. He serves on the board of directors for Girls Who Code and is the executive sponsor for Raytheon Technologies' Re-Empower Program.

He holds a bachelor's degree in information systems and marketing from the State University of New York at Albany.
